

Application No. 10/689,315
Amendment After Notice of Allowance
dated July 29, 2004

REMARKS

The foregoing amendment is being submitted after formal Notice of Allowance in order to incorporate the changes requested by the Examiner in the Examiner's Amendment dated April 30, 2004 and to make a few other minor corrections in the specification and drawings.

In the specification, page 3, line 22, the word "within" has been added after "mounted". On page 5, third line from the bottom, the word "Figure" has been changed to "Figures". On page 7, third line from the bottom, the letter "A" has been changed to "An". On page 9, also third line from the bottom, the word "Figure" has been changed to "Figures". On page 14, line 15, the spelling of "track" has been corrected. On page 15, line 14, the word "secure" has been changed to "securing".

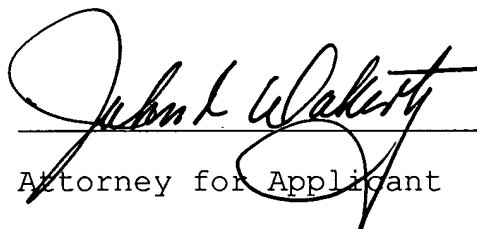

In the new drawing sheets, the Prior Art label has been added to Figures 9 and 10a as requested by the Examiner as well as to Figure 3 which shows a take-up roll according to the prior art. The lead lines for reference numerals 40 and 42 now include arrowheads in Figures 1, 2, 7, 8 and 10b as also requested by the Examiner. In Figure 8, the reference numeral 33 denoting the take-up roll shaft has been added as further requested by the

Examiner. In addition, the right hand plank-like wood upper section has been correctly denoted in Figure 8 by the reference numeral 24 as opposed to 22. Also, the lead lines for the reference numeral 68 in Figure 10a have been provided with arrowheads and in Figure 7, the numeral 16 for the hub on the right side of the truck body 10 has been changed to 36.

These changes and corrections are of a minor nature and do not effect the scope or meaning of the allowed claims nor do they require a further search of the prior art. Accordingly, it is submitted that the amendments are proper and ought to be entered at this time.

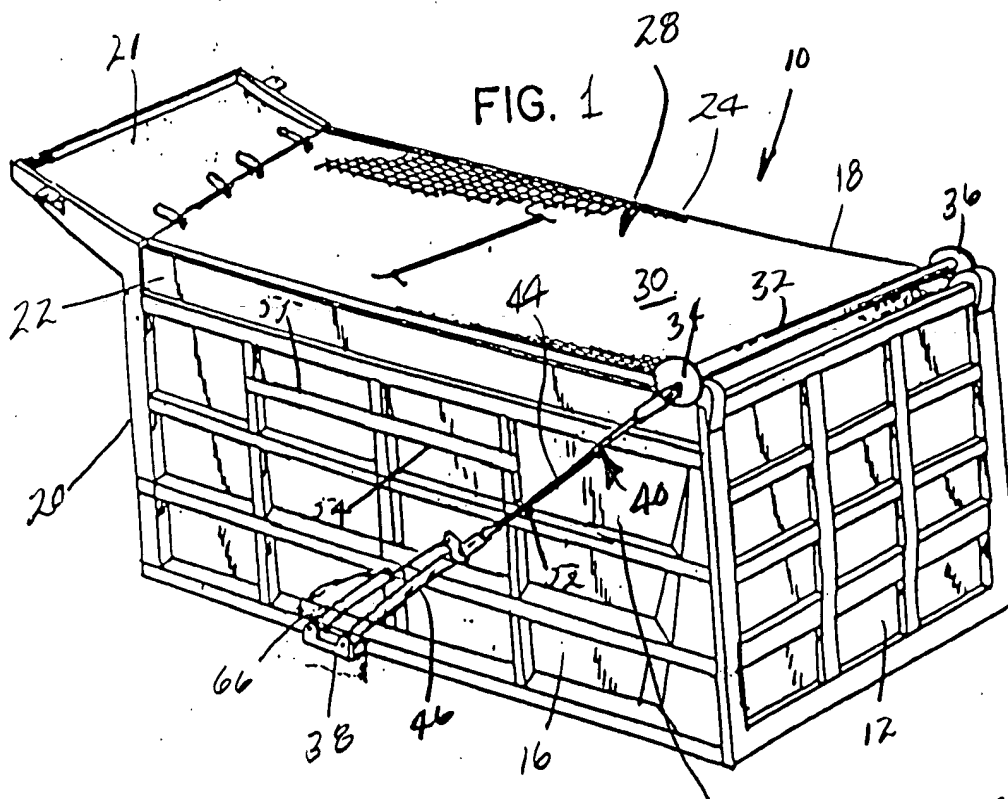

The issue fee accompanies this paper.

Respectfully submitted,

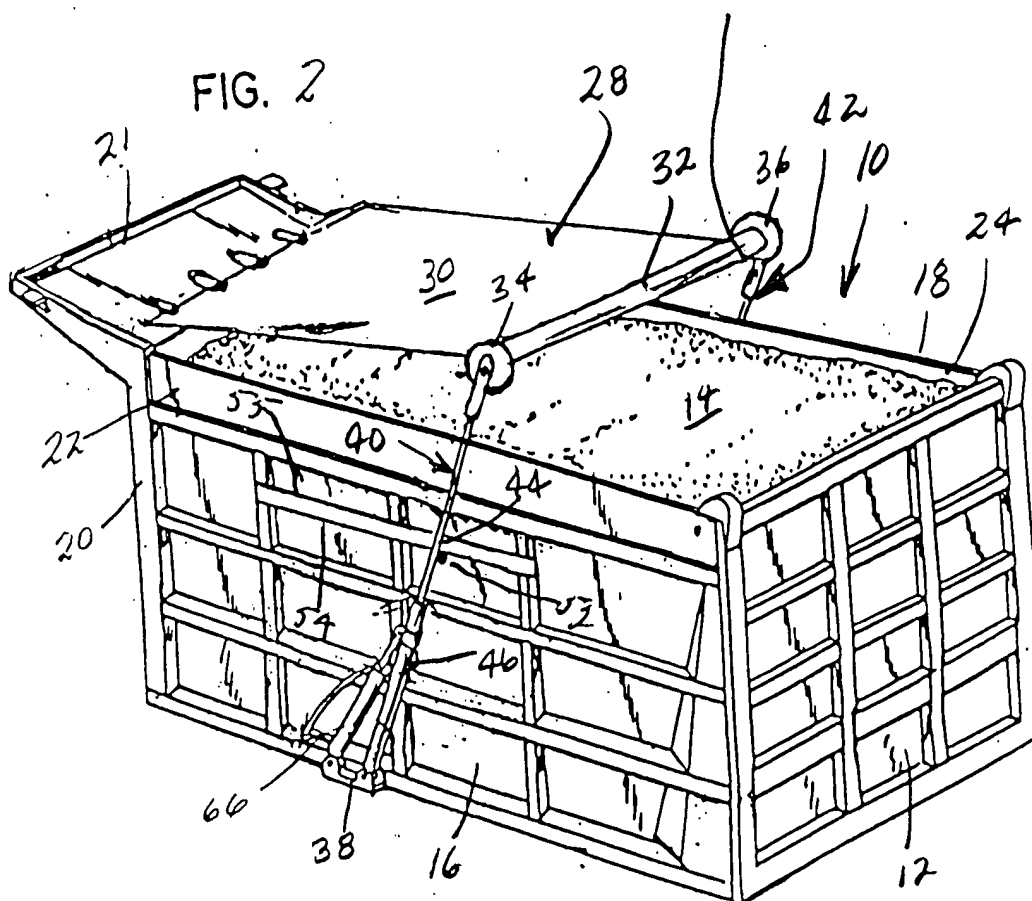

Attorney for Applicant
